# ABOUT US

Owned and operated by the Port of Olympia, our 66-acre terminal is situated on Budd Inlet at the head of Puget Sound.

We are centrally located to serve Puget Sound and the Columbia River Basin, providing ready access to local, regional and international markets.

The Port of Olympia is part of the Green Marine environmental certification program, making it one of the first 40 Port Authorities to do so globally, and the fourth regional Port.

Green Marine is a voluntary third-party certification program that requires participating port authorities to establish baseline performance indicators in multiple facets of Marine Terminal operations, and then demonstrate tangible year-over-year improvements to maintain certification. The certification system evaluates six distinct operational areas, including:

- Spill Prevention
- Dry Bulk Handling and Storage
- Community Impacts
- Environmental Leadership
- Waste Management
- Greenhouse Gases
